

REGISTRATION FEES

(Early / Late)

Research active scientist:
295,00 € / 450,00 €

Concession/students:
150,00 € / 250,00 €

DEADLINES

15 January 2020

Online registration opens

5 March 2020

Abstract submission opens

25 May 2020

Abstract submission closes

15 June 2020

Early registration closes

Late-breaking poster submission opens

15 July 2020

Late-breaking poster submission closes

1 September 2020

Late registration closes

10 September 2020

Pre-Meeting Symposia

11 – 13 September 2020

Meeting dates

Feedback from Europhysiology 2018

"Europhysiology was excellent. Very well organized and well located. The research subjects presented were very broad and yet specialized. This is a must-see for physiologists specialized in all fields. Poster presentations and lunchtime were excellent occasions to meet scientists from every part of the world. I'll go to Berlin for sure!"

"A very good meeting, well organised and with very good scientific content."

"A highly organised meeting with participants from all the corners of the globe. The popularity of physiology was felt heartily and feeling proud to witness the various disciplines of physiology being discussed under the same roof. Look forward to see the expanded physiology team at Berlin2020 and hope to create another wonderful memory."

EUROPHYSIOLOGY 2020

A partnership between The Physiological Society, the Scandinavian Physiological Society, the German Physiological Society and the Federation of European Physiological Societies

Bringing Together Europe's Physiologists

ABSTRACT
DEADLINE
25 MAY 2020

11-13 September 2020 **Berlin**

Pre-Conference Symposia 10 September 2020

www.europhysiology2020.org

WELCOME

It is our pleasure to invite you to Europhysiology 2020, a partnership of The Physiological Society, the Scandinavian Physiological Society, the German Physiological Society and the Federation of European Physiological Societies.

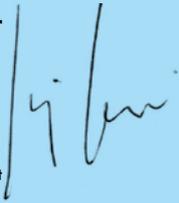

The meeting will take place in the Estrel Congress Center Berlin, 11-13 September 2020. Pre-symposia will be held on 10 September 2020.

Europhysiology 2020 is a continuation of a successful series that started with Europhysiology 2018 in London and will be continued with Europhysiology 2022 in Copenhagen. In those years Europhysiology replaces the annual meetings of the partner societies and brings together the physiologists of Europe and the World.

Based on the overwhelming success of Europhysiology 2018, we expect more than 1400 participants and a highly attractive scientific programme, covering all aspects of physiology. The programme includes keynote and prize lectures delivered by world-class speakers, symposia, abstract presentations and workshops. There will also be pre-symposia from special interest groups and early career physiologists, as well as an exciting social programme and a public lecture.

We look forward to welcoming you to Berlin.

Jörg Geiger

Congress President

For the partnering societies

Ralf Brandes

Secretary
General
German
Physiological
Society

Bridget Lumb

President
The Physiological
Society

Kristian Gundersen

President
Scandinavian
Physiological
Society

Susan Wray

President
Federation
of European
Physiological
Societies

WHY SHOULD YOU JOIN US IN BERLIN?

- Hear the latest physiology research
- Present your work to over 1400 scientists in the many oral presentation and poster sessions
- Expand your network and make new collaborations
- Get support to attend from one of our travel awards
- Win a poster or best abstract award

PROGRAMME HIGHLIGHTS

Confirmed keynote and plenary speakers to date

David Attwell, University College London	Julia Gorelik, Imperial College London
Walter Boron, Case Western Reserve University	Fiona Gribble, University of Cambridge
Annette Dolphin, University College London	Peter Hegemann, Humboldt Universität zu Berlin
Bernd Fakler, University of Freiburg	James Clark, King's College London
Maria Fitzgerald, University College London	Heidi McBride, McGill University
Holger Gerhardt, Max-Delbrück-Center for Molecular Medicine in the Helmholtz Association (MDC)	Roy Taylor, Newcastle University
	Volker Vallon, University of California San Diego

Selected Symposia

- The Athlete's Heart
- Cardiac sodium channel: From function to dysfunction
- Embedding authentic learning experiences in the physiology curriculum
- Extracellular vesicles – regulators of health and disease
- From basic renal function to systemic disease
- From human to superhuman: The impact of the microbiota on physiology
- Inhibitory mechanisms in cortical information flow and neuronal representation
- Ion channels in epithelia
- Mitochondrial network dynamics - how structure alters function
- Molecular signalling in skeletal muscle in aging and disuse.
- Na,K-ATPase signal transduction in control of homeostasis: regulation of cardiovascular and kidney functions.
- Novel roles of the extracellular microenvironment in salt and water metabolism
- Organellar pH regulation in health and disease
- Oxidation in health and disease
- Oxygen sensing in health and disease
- The physiology of H2S
- Single cell RNA sequencing: The next big thing
- Welcome to the zoo: Properties of sensory neurons from various species help to understand human neuropathies

Pre-Conference Symposia

- Young Physiologists' symposium
- FEPS-IUPS workshop & discussion: Africa-Europe collaborations
- 6 focused symposia: Heart, Vessels, Skeletal muscle, Exercise, Kidney, Neurophysiology
